Description

Environment: Staging

Description: When a new employee registers using the invitation letter received after being created by an admin, filling in all required fields including first name, last name, email, and password, and clicking "Register," a 400 error response status is displayed in the devtools console network section.

Pre-conditions:

1. A new employee gets an inviatian via email.

STR:

1. Clicks on the invitation button in the email.
2. Rdirect to the login page.
3. Fill in all required fields including first name, last name, email, and password.
4. Click the "Register" button.

Expected result: After entering valid information in all required fields and clicking "Register," the employee is successfully registered and granted access to the system without any error messages or issues.

Actual result: Despite providing valid information during registration, the employee encounters an error 400 with the message indicating an invalid email.The employee is unable to complete the registration and access the system as expected.

Evidence: https://drive.google.com/file/d/1AvxsQA3sHSeaJa-9dv1Lp843bO4goXUc/view?usp=sharing

Component: Backend

User story: As a new employee, I want to successfully register and access the system after receiving an invitation from the admin, So that I can begin my onboarding process without encountering any issues.

Functionality: Log in via invitation letter

[SCRUM-21] [PAYP-394] Validation Message Language Mismatch Created: 30/Apr/24 Updated: 30/Apr/24

Status:	To Do

Description

Environment: Staging

Description: When a user edits a new employee account and updates all required information, after clicking the save button, the validation message about success is displayed in English, even though the user is using a German language interface.

Pre-conditions:

1. A user is registered and logged in the system as an admin.
2. Choose the “NO“ business.
3. Navigate to “Settings“ app.

STR:

1. Navigate to the “Settings“ app.
2. Choose the “Employees“ section.
3. Click “+“ button to create an employee profile.
4. Update all required information for the employee account.
5. Click the "Save" button to save the changes.

Expected result: After creating the new employee account and receiving a validation message about success, the message is displayed in the same language as the interface language selected by the user (in this case, German).

Actual result: Despite using the German language interface, the validation message about success is displayed in English after updating the new employee account.

Evidence: https://drive.google.com/file/d/1AvxsQA3sHSeaJa-9dv1Lp843bO4goXUc/view?usp=sharing

Component: Frontend

User story: As a user of the system, I want validation messages about successful actions to be displayed in the same language as my selected interface language, So that I can easily understand and interpret the messages without confusion.

Functionality: Display of the message after creating a new employee account

[SCRUM-20] [PAYP-393] City Information Not Saved Without Choosing from Dropdown List Created: 30/Apr/24 Updated: 30/Apr/24

Status:	To Do
Project:	Payever
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	**Priority:**	Medium
Reporter:	tester	**Assignee:**	Unassigned
Resolution:	Unresolved	**Votes:**	0
Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original estimate:	Not Specified		

Rank:	0|i00047:
Sprint:	

Description

Environment: Staging

Description: When a user updates information about the city by manually typing the name without choosing an option from the dropdown list and clicks "Save," a valid message about successful change is displayed on the page. However, upon reopening the user's profile, the city field is empty, indicating that the information was not saved properly. The city information is only saved if the user chooses an option from the dropdown list.

Pre-conditions:

1. A user is registered and logged in the system as an admin.
2. Choose the “NO“ business.
3. Navigate to “Settings“ app.

STR:

1. Navigate to the “Settings“ app.
2. Choose the “Employees“ section.
3. Click on the emplyee`s account to edit profile.
4. Update the city information by manually typing the name without choosing an option from the dropdown list.
5. Click the "Save" button to save the changes.
6. Reopen the user's profile to check the city information.

Expected result: After updating city information and receiving a valid message about successful change, the updated information is saved and persisted in the system. Reopening the user's profile displays the updated city details accurately, regardless of whether the user chooses from the dropdown list or manually types the city name.

Actual result: Despite receiving a valid message about successful change, the city information updated by the user is not saved properly if the user manually types the city name without choosing an option from the dropdown list. The city field remains empty upon reopening the user's profile.

Evidence:
https://drive.google.com/file/d/10q_VzBFHGPDXFtBiN8BThuLYt50mqLSd/view?usp=sharing

Component: Backend

User story: As a user, I want the city information I update to be properly saved and persisted in the system, So that my profile reflects accurate and up-to-date details.

Functionality: Employee Account Editing

[SCRUM-19] [PAYP-392] Address Information Not Saved After Employee Update Created: 30/Apr/24 Updated: 30/Apr/24

Description

Environment: Staging

Description: After an employee updates their address information by manually entering the details without choosing options from the drop-down list, the valid message about successful change is displayed on the page. However, upon reopening the user's profile, the address field is empty, indicating that the information was not saved properly.

Pre-conditions:

1. A user is registered and logged in the system as an admin.
2. Choose the “NO“ business.
3. Navigate to “Settings“ app.

STR:

1. Navigate to the “Settings“ app.
2. Choose the “Employees“ section.
3. Click on the emplyee`s account to open profile.
4. Update the address information by manually entering the details without choosing options from the drop-down list.
5. Click the "Save" button to save the changes.
6. Reopen the user's profile or navigate back to the address information page.

Expected result: After updating address information and receiving a valid message about successful change, the updated information is saved and persisted in the system. Reopening the user's profile displays the updated address details accurately.

Actual result: Despite receiving a valid message about successful change, the address information updated by the employee is not saved properly. Reopening the user's profile reveals that the address field is empty.

Evidence: https://drive.google.com/file/d/1fKJe-jsvB2yARaA_d8bpl_kmVxD85ZQv/view?usp=drive_link

Component: Backend

User story: As an employee, I want the address information I update to be properly saved and persisted in the system, So that my profile reflects accurate and up-to-date details.

Functionality: Employee Account Edit

[SCRUM-18] [PAYP-388] Inconsistent Display of Limited Access Apps Icons After Access Modification Created: 30/Apr/24 Updated: 30/Apr/24

Status:	To Do
Project:	Payever
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	**Priority:**	Medium

Rank:	0|i0003r:
Sprint:	

Description

Environment: Staging

Description: After an employee updates and changes their access permissions to certain apps, limiting access to some of them, the icons of the limited access apps continue to be displayed on the apps page even after navigating back from the access modification page.

Pre-conditions:

1. A user is registered and logged in the system as an admin.
2. Choose the “NO“ business.
3. Navigate to “Settings“ app.

STR:

1. Navigate to the “Settings“ app.
2. Choose the “Employees“ section.
3. Click “+“ button to create a new employee.
4. Limit access to some apps.
5. Click the "Save" button to save changes.
6. Click "Back to Apps" to navigate to the apps page.
7. Refresh the page or perform an extra update.

Expected result: After creating a new employee account, the first name and last name entered during the creation process are saved and displayed accurately in the employee profile window. The displayed name match the name entered by the admin during account creation.

Actual result: After modifying access permissions and navigating back to the apps page, only the icons of apps the employee has access to are displayed.

Evidence: https://drive.google.com/file/d/141bdynzb2cblYzhHZ9KB4-Iphlrepf6Q/view?usp=sharing

Component: Frontend

User story: As an employee, I want the icons of limited access apps to be consistently hidden from the apps page after modifying my access permissions, So that I can easily identify the apps I have access to without confusion.

Functionality: Apps page

[SCRUM-17] [PAYP-388] Employee Can Unauthorizedly Modify Access Permissions Created: 30/Apr/24 Updated: 30/Apr/24

Description

Environment: Staging

Description: Employees are able to update and change their access permissions to various apps, including adding or removing limits.

Pre-conditions:

1. A user is registered and logged in the system as an admin.
2. Choose the “NO“ business.

STR:

1. Navigate to the “Settings“ app.
2. Choose the “Employees“ section.
3. Click the profile of this account in the list of employees.
4. Attempt to update or change the access permissions for various apps.
5. Click the "Save" button to save changes.

Expected result: Employees don`t have the authority to update or change their access permissions to apps without proper authorization.

Actual result: Employees are able to update and change their access permissions to apps without any restrictions or authorization checks. This allows employees to unauthorizedly modify their access permissions.

Evidence: https://drive.google.com/file/d/141bdynzb2cblYzhHZ9KB4-Iphlrepf6Q/view?usp=sharing

Component: Backend

User story: As an employer, I want to restrict employees from unauthorizedly modifying their access permissions to apps, So that I can ensure the security and integrity of the system's access control mechanisms.

Functionality: Employee Access Control

[SCRUM-16] [PAYP-388] Incorrect Name Saved in Employee Account Creation

Created: 30/Apr/24 Updated: 30/Apr/24

Status:	To Do
Project:	Payever
Components:	None
Affects versions:	None
Fix versions:	None

Description

Environment: Staging

Description: When an employer creates a new account for an employee and enters "first" in the first name field and "last" in the last name field, the entered name is not saved. Instead, the name from the employee's email address is automatically taken and saved.

Pre-conditions:

1. A user is registered and logged in the system as an admin.
2. Choose the “NO“ business.

STR:

1. Navigate to the “Settings“ app.
2. Choose the “Employees“ section.
3. Click “+“ button to create a new employee.
4. Enter "first" in the first name field and "last" in the last name field.
5. Provide the employee's email address and any other required information.
6. Click the "Save" button to create the employee account.

Expected result: When creating a new employee account, the name entered by the employer in the first name and last name fields is saved as the employee's name.

Actual result: The name entered by the employer in the first name and last name fields is not saved. Instead, the name from the employee's email address is automatically taken and saved as the employee's name. This results in incorrect information being stored in the employee's account and can lead to confusion and inaccuracies in the system.

Evidence: https://drive.google.com/file/d/141bdynzb2cblYzhHZ9KB4-Iphlrepf6Q/view?usp=sharing

Component: Backend

User story: As an employer, I want the name entered during the creation of a new employee account to be accurately saved in the employee's account, so that I can maintain accurate employee records and prevent confusion in the system.

Functionality: Employee Profile

[SCRUM-15] [PAYP-387] Admin Account Able to Delete Other Admin Accounts Created: 30/Apr/24 Updated: 30/Apr/24

Description

Environment: Staging

Description: When a newly created admin account attempts to delete another admin account, the operation is successful, contrary to the intended behavior.

Pre-conditions:

1. A user is registered and logged in the system as an admin.
2. Choose the “NO“ business.

STR:

1. Navigate to the “Settings“ app.
2. Select another admin account from the list of users.
3. Attempt to delete the selected admin account.

Expected result: Admin accounts can`t delete other admin accounts. Attempting to delete another admin account result in an error message or notification indicating that the operation is not permitted.

Actual result: The newly created admin account is able to successfully delete another admin account.

Evidence:
https://drive.google.com/file/d/1jbFoKIUVxCjQ7VAsWMhvXbr9vSYUZIcz/view?usp=sharing

Component: Backend

User story: As a system administrator, I want to ensure that admin accounts cannot delete other admin accounts, so that I can maintain the integrity and security of the system's user management functionality.

Functionality: Employees Accounts

Functionality: Employee Profile

[SCRUM-13] [PAYP-386] Employee with Limited Access Can Customize Access Beyond Allowed Permissions Created: 30/Apr/24 Updated: 30/Apr/24	
Status:	To Do
Project:	Payever
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	**Priority:**	Medium
Reporter:	tester	**Assignee:**	Unassigned
Resolution:	Unresolved	**Votes:**	0
Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original estimate:	Not Specified		

Rank:	0|i0002n:
Sprint:	

Description

Environment: Staging

Description: When an admin creates a new employee account with limited access, such as access only to settings and custom access to checkouts, the new employee can customize their access and set full access permissions. However, this level of customization should only be allowed for employer accounts. This discrepancy in access control allows employees to exceed their assigned permissions.

Pre-conditions:

1. Log in to the Staging env. as an admin.

STR:

1. Create a new employee account with limited access permissions, such as access only to settings and custom access to checkouts.
2. Log in to the system using the newly created employee account.
3. Navigate to the access settings or permissions section.
4. Attempt to customize access permissions beyond the assigned permissions, such as setting full access.

Expected result: Employees with limited access permissions are not able to customize their access beyond the permissions assigned to them during account creation. The system enforces strict access control to prevent employees from exceeding their assigned permissions.

Actual result: Employees with limited access permissions, such as access only to settings and custom access to checkouts, are able to customize their access and set full access permissions. This allows employees to exceed their assigned permissions.

Evidence:
https://drive.google.com/file/d/1JhXcLDuxOqTp63H8kQTGJGnhc6sVijBH/view?usp=drive_link

Component: Backend

User story: As an administrator, I want to ensure that employees with limited access permissions cannot customize their access beyond the permissions assigned to them, so that I can maintain strict access control and prevent unauthorized access within the system.

Functionality: Employee Accounts

[SCRUM-12] [PAYP-366] Lack of Validation for Spaces in First Name and Last Name Fields Created: 26/Apr/24 Updated: 26/Apr/24

Status:	To Do
Project:	Payever
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	**Priority:**	Medium
Reporter:	tester	**Assignee:**	Unassigned
Resolution:	Unresolved	**Votes:**	0
Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original estimate:	Not Specified		

Rank:	0|i0002f:
Sprint:	

Description

Environment: Staging

Description: When a registered user navigates to the contact information on the Business Details page and changes the first name and last name fields to include only spaces, no validation messages appear on the page. Despite the lack of valid input, the new information is saved after clicking the "Save" button.

Pre-conditions:

1. A user is registered and logged in the system.

STR:

1. Choose Business in the list of businesses.
2. Navigate to settings in the “Business Apps“ section.
3. Choose Settings.
4. Navigate to Settings page.
5. Click Business details on the Setting page.
6. Click Contact.
7. Change the before input date in the First name field with spaces.
8. Change the before input date in the Last name field with spaces.
9. Click the "Save" button to save the changes.

Expected result: When editing the first name and last name fields, entering only spaces should trigger validation messages indicating that the input is invalid.

Actual result: No validation messages appear on the page when entering spaces as the first name and last name. Despite the lack of valid input, the new information with spaces is saved successfully after clicking the "Save" button.

Evidence:
https://drive.google.com/file/d/11HWesG8voC92XGY5QeTzxLv1Ux4YYYsL/view?usp=drive_link

Component: Frontend

User story: As a user, I want the system to validate and prevent the entry of spaces-only values in the first name and last name fields, so that data integrity and consistency are maintained within user profiles.

Functionality: Contact of Business Details

[SCRUM-11] [PAYP-365] Employee Profile Not Created with Cashier Position and Full Affiliate Access Created: 26/Apr/24 Updated: 26/Apr/24

Sprint:	

Description

Environment: Staging

Description: After creating a new employee profile, filling the necessary fields, choosing the "Cashier" position, and full access to affiliates, clicking the "Save" button, the employee profile is not created. Instead, an invalid message [object][object] is displayed on the page.

Pre-conditions:

1. A business acount of employer is registered and logged in the system.

STR:

1. Navigate to the page for creating a new employee profile.
2. Fill out the necessary fields for the employee profile, including First name, Surname and email.
3. Choose the "Cashier" position for the employee.
4. Choose full access to affiliates by selecting the appropriate option.
5. Select all optional access for various options available, ensuring that access is granted for each.
6. Click the "Save" button to create the employee profile.

Expected result: After filling out the necessary fields and clicking the "Save" button, the employee profile is successfully created with the chosen position and access settings. The user should receive a confirmation message indicating successful creation, and no invalid messages should be displayed.

Actual result: The employee profile is not created after clicking the "Save" button. Instead, an invalid message [object][object] is displayed on the page, indicating a failure in the creation process. The employee profile is not created.

Evidence: https://drive.google.com/file/d/1cCdtSMN7MmYEF4s8XmmFOSJ2OKloXemC/view?usp=drive_link

Component: Backend

User story: As an employer, I want to be able to create employee profiles with the "Cashier" position and full access to affiliates, so that I can effectively manage employee roles and access permissions within the system.

Functionality: Add New Employee Profiles

[SCRUM-10] [PAYP-300] Deleted Checkouts Remain in List Despite Successful Deletion Message Created: 26/Apr/24 Updated: 26/Apr/24			
Status:	To Do		
Project:	Payever

Sprint:	

Description

Environment: Staging

*Description:*After deleting checkouts from the list and receiving a message confirming successful deletion, the deleted checkouts remain visible in the list.

Pre-conditions:

1. The emplyee is logged in.

STR:

1. Choose company on the Choose Business page.
2. Click on image of the chosen business.
3. Click checkout in Business Apps window.
4. Click Settings on the Checkout page.
5. Click on the name of the checkout.
6. Click delete checkout.
7. Observe the message confirming successful deletion.

Expected result: After successfully deleting checkouts from the list, the deleted checkouts are no longer visible in the list.

Actual result: Despite receiving a message confirming successful deletion, the deleted checkouts remain visible in the list, indicating that the deletion process is not properly removing the checkouts from the list.

Evidence: https://drive.google.com/file/d/1Yj5ajT-JKOxOzYDnkoSu3HHnD0iwBGNi/view?usp=drive_link

Component: Frontend

User story: As a user, I want deleted checkouts to be removed from the list after receiving a confirmation message about successful deletion, so that I can trust that the checkouts list accurately reflects the current state of the system

Functionality: Checkout Deletion

[SCRUM-9] [PAYP-300] Business List Not Displayed After Logging in via Invitation Link in Employee Profile Created: 26/Apr/24 Updated: 26/Apr/24

Status:	To Do
Project:	Payever
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	**Priority:**	Medium
Reporter:	tester	**Assignee:**	Unassigned
Resolution:	Unresolved	**Votes:**	0
Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original estimate:	Not Specified		

Rank:	0|i0001r:
Sprint:	

Description

Environment: Staging

Description: After creating an employee profile and using the invitation link sent via email to log in to the site, the list of businesses is not displayed on the "Choose Business" page. Despite being associated with one or more businesses, the employee is unable to select a business to proceed.

Pre-conditions:

1. The invitation link of emploee is sent via email/

STR:

1. Click the invitation link in the email to log in to the site.
2. Check if the list of businesses associated with the employee profile is displayed.

Expected result: After logging in via the invitation link, the employee should be presented with the "Choose Business" page displaying the list of businesses associated with their profile. This allows the employee to select a business and proceed with oyjer pages.

Actual result: Despite being associated with one or more businesses, the list of businesses is not displayed on the "Choose Business" page after logging in via the invitation link. This prevents the employee from selecting a business and proceeding with accessing the site.

Evidence: https://drive.google.com/file/d/1Yj5ajT-JKOxOzYDnkoSu3HHnD0iwBGNi/view?usp=drive_link

Component: Backend

User story: As an employee invited to access the site via email, I want the list of businesses associated with my profile to be displayed on the "Choose Business" page after logging in via the invitation link, so that I can select the appropriate business and proceed with accessing the site.

Functionality: Emplyee Profile Navigation

[SCRUM-8] [PAYP-300] Employee Access Options Not Saved When Creating New Employee Profile Created: 26/Apr/24 Updated: 26/Apr/24

Status:	To Do
Project:	Payever
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	**Priority:**	Medium
Reporter:	tester	**Assignee:**	Unassigned
Resolution:	Unresolved	**Votes:**	0
Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original estimate:	Not Specified		

Rank:	0|i0001j:
Sprint:	

Description

Environment: Staging

Description: After the user fills out the necessary data for a new employee in the "Add Employee" window and selecting all optional access for various options, clicking "Save" does not save the previously chosen access options. Upon opening the newly created profile of the employee, the access options are not retained.

Pre-conditions:

1. A business account of employer is registered in the system.
2. The user is logged in.

STR:

1. Navigate to settingsin the “Business Apps“ section.
2. Choose Employees on the Setting page.
3. Click “+“ to add new employee profile.
4. Fill out the required data for a new employee, such as First name, Last name and email.
5. Choose Admin in the Position drop-down list.
6. Select all optional access for various options available, ensuring that access is granted for each.
7. Click "Save" to create the new employee profile.
8. Open the newly created profile of the employee.

Expected result: After filling out the necessary data for a new employee and selecting optional access options, clicking "Save" should save the chosen access options. Upon opening the newly created employee profile, the access options should be retained and reflect the selections made during employee creation.

Actual result: The previously chosen access options are not saved when creating a new employee profile. Upon opening the newly created employee profile, the access options do not match the selections made during employee creation.

Evidence: https://drive.google.com/file/d/1Yj5ajT-JKOxOzYDnkoSu3HHnD0iwBGNi/view?usp=drive_link

Component: Backend

User story: As an administrator, I want access options selected for new employee profiles to be saved accurately, so that access permissions are consistently applied and maintained in the employee management system.

Functionality: Add New Employee Profiles

[SCRUM-7] [Cosf-5057] Previous Pinned Message Disappears After Accessing Pinned Messages Counter Created: 26/Apr/24 Updated: 30/Apr/24

Status:	To Do
Project:	Payever
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	**Priority:**	Medium
Reporter:	tester	**Assignee:**	Unassigned
Resolution:	Unresolved	**Votes:**	0
Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original estimate:	Not Specified		

Rank:	0|i0001b:
Sprint:	

Description

Environment: Staging

Description: After the user clicks the option button to view pinned messages in the chat interface, the previous pinned message disappears from the sender's side of the chat. However, upon refreshing the page, the previous pinned message reappears as expected. It occurs only on the sender side of the chat.

Pre-conditions:

1. A business account is registered in the system.
2. The user is logged in.

STR:

1. Navigate to messages in the “Business Apps“ section.
2. Open the Message page.
3. Open already exist chat window.
4. Put in “pin“ in the message line.
5. Pin a message in the chat by selecting the option provided.
6. Click the option button to view pinned messages in the chat interface.
7. Refresh the page.

Expected result: When clicking the option button to view pinned messages, the previous pinned message remains visible on the sender's side of the chat, maintaining consistency in the display of important messages.

Actual result: The previous pinned message disappears from the sender's side of the chat after clicking the option button to view pinned messages. However, upon refreshing the page, the previous pinned message reappears as expected.

Evidence: https://drive.google.com/file/d/1nGP-We32-Y9PQxj3EeCgscYGHdDO9kLJ/view?usp=sharing

Component: Frontend

User story: As a user, I want pinned messages to remain visible on the sender's side of the chat interface when viewing pinned messages, so that I can easily access important information without disruptions or inconsistencies.

Functionality: Pinned Message in Chat Interface.

[SCRUM-6] [Cosf-5057] Pinned Message Persists in Chat After Deletion Until Page Update Created: 26/Apr/24 Updated: 30/Apr/24

Status:	To Do
Project:	Payever
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	**Priority:**	Medium
Reporter:	tester	**Assignee:**	Unassigned
Resolution:	Unresolved	**Votes:**	0
Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original estimate:	Not Specified		

Rank:	0|i00013:
Sprint:	

Description

Environment: Staging

Description: After the user deletes a pinned message in the chat interface, the message continues to appear as pinned within the chat until the page is manually refreshed or updated. However, upon refreshing the page, the pinned message disappears as expected.

Pre-conditions:

1. A business account is registered in the system.
2. The user is logged in.

STR:

1. Navigate to messages in the “Business Apps“ section.
2. Open the Message page.
3. Open already exist chat window.
4. Put in “pin“ in the message line.
5. Pin a message in the chat by selecting the option provided.
6. Delete the pinned message by selecting the delete option.
7. Update the page.

Expected result: After deleting a pinned message in the chat interface, the message immediately disappears from the pinned section, reflecting the deletion action and maintaining consistency with the chat's current state.

Actual result: The deleted message persists as pinned within the chat interface even after deletion, until the page is manually updated. Upon refreshing the page, the deleted message disappears as expected.

Evidence: https://drive.google.com/file/d/1nGP-We32-Y9PQxj3EeCgscYGHdDO9kLJ/view?usp=sharing

Component:

Frontend

- If the bug occurs solely within the user interface (UI) of the chat interface, such as the display and management of pinned messages, then it's likely a frontend bug.

Backend

- If the persistence of deleted pinned messages is related to how data is managed and transmitted between the frontend and backend, then the bug may be a backend issue.

User story: As a user, I want deleted pinned messages to disappear immediately from the chat interface without requiring a manual page update, so that I can trust that the chat interface accurately reflects the current state of conversations.

Functionality: Pinned Message in Chat Interface.

[SCRUM-5] [Cosf-5056] Emojis List in Chat Interface - Emojis List Doesn't Disappear After Hover Removal or Interaction with Other Elements Created: 26/Apr/24 Updated: 30/Apr/24

Status:	To Do
Project:	Payever
Components:	None
Affects versions:	None

Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original estimate:	Not Specified		

Rank:	0|i0000v:
Sprint:	

Description

Environment: Staging

Description: When the user hovers over the emoji icon to display the emojis list in the chat interface, the list does not disappear when the mouse is removed or when the user interacts with other elements in the interface. This behavior persists even when opening other chats or clicking on other objects, causing the emojis list to obstruct the view and impede interaction with the chat interface.

Pre-conditions:

1. A business account is registered in the system.
2. The user is logged in.

STR:

1. Navigate to messages in the “Business Apps“ section.
2. Open the Message page.
3. Open already exist chat window.
4. Hover over the emoji icon to display the emojis list.
5. Remove the mouse from the emoji icon without selecting an emoji.
6. Opening other chats.

Expected result: After removing the mouse from the emoji icon or interacting with other elements in the chat interface, the emojis list disappears automatically, allowing users to continue interacting with the interface without obstruction.

Actual result: The emojis list remains visible even after removing the mouse from the emoji icon or interacting with other elements in the chat interface. This behavior persists, obstructing the view and impeding interaction with the chat interface until manually closed.

Evidence:
https://drive.google.com/file/d/1WaZ9oiE5tyAxcUTRXvLnDwsUarlJzI8h/view?usp=sharing

Component: Frontend

User story: As a user, I want the emojis list to disappear automatically after removing the mouse from the emoji icon or interacting with other elements in the chat interface, so that I can navigate and interact with the chat interface without obstruction.

Functionality: Emojis List in Chat Interface

[SCRUM-4] [Cosf-5023] Incorrect Time - IIncorrect Timestamp Displayed During Redirection Created: 26/Apr/24 Updated: 30/Apr/24

Status:	To Do
Project:	Payever
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	**Priority:**	Medium
Reporter:	tester	**Assignee:**	Unassigned
Resolution:	Unresolved	**Votes:**	0
Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original estimate:	Not Specified		

Attachments:	Scrum 3.mp4
Rank:	0|i0000n:
Sprint:	

Description

Environment: Staging

Description: After the user redirects from the Business Apps page to the Message page, an incorrect timestamp is displayed, suggesting an erroneous duration for the redirection process. This discrepancy may cause confusion for users and mislead them regarding the time taken for the navigation.

Pre-conditions:

1. A business account is registered in the system.

STR:

1. Log in to the system.
2. Select the existing business profile.
3. Navigate to the Business Apps page.
4. Attempt to access the Message page by clicking on the relevant button.
5. Observe the timestamp displayed indicating the duration of the redirection process.

Expected result: The timestamp indicating the duration of the redirection process should accurately reflect the time taken for the navigation from the Business Apps page to the Message page.

Actual result: The timestamp displayed for the redirection process inaccurately represents the time taken for the navigation, suggesting an incorrect duration.

Component:

Frontend:

- If the timestamp is generated and displayed by the frontend application, indicating the time taken for the redirection process, then the bug is likely a frontend issue.Frontend code is responsible for displaying the timestamp may have a bug causing it to calculate or display the time incorrectly.

Backend:

- If the timestamp is generated by the backend server and then displayed by the frontend, the issue might be a backend problem. Backend code responsible for handling the redirection process and sending timing data to the frontend may have a bug.

User story: As a user, I want the timestamp displayed during redirection to accurately reflect the time taken for the process, so that I can have a clear understanding of the performance of the system.

Functionality: Redirection from Business App page to Message page.

[SCRUM-3] [Cosf-5023] Picture Visibility - Picture Not Visible in Small Window After Uploading in Message Chat Created: 26/Apr/24 Updated: 30/Apr/24

Status:	To Do
Project:	Payever
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	**Priority:**	Medium

Resolution:	Unresolved	**Votes:**	0
Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original estimate:	Not Specified		

Attachments:	bandicam 2024-04-26 19-24-53-110.mp4
Rank:	0|i0000f:
Sprint:	

Description

Environment: Staging

Description: After the user uploads a picture in the message chat, the picture is not visible in the small window or thumbnail preview within the chat interface. This issue prevents users from quickly viewing the uploaded picture without opening it separately, reducing the efficiency and convenience of the chat feature.

Pre-conditions:

1. A business account is registered in the system.

STR:

1. Log in to the system.
2. Select the existing business profile.
3. Navigate to the messaging feature located in the "Business Apps" section.
4. Enter an ongoing conversation or select an existing conversation thread.
5. Click on the "+" icon adjacent to the message input area.
6. From the options presented, choose "Photo and Video" from the Add list.
7. Click on "Add More" to initiate the file selection process.
8. Select a file to upload from the device's gallery, ensuring it is in .png format.
9. Observe the small thumbnail preview within the chat interface where the uploaded picture should be displayed.

Expected result: After uploading a picture in the message chat, the uploaded picture should be immediately visible in the thumbnail preview within the chat interface. Users should be able to preview the uploaded picture without needing to open it separately.

Actual result: After uploading a picture in the message chat, the picture is not visible in the small window or thumbnail preview within the chat interface. Instead, the small window remains blank or displays a placeholder image, failing to show the uploaded picture.

Component:

Frontend:

- If the bug is related to how the frontend application handles displaying images within the chat interface, such as rendering thumbnails or preview images, then the fix would likely involve changes to the frontend code.

Backend:

- If the bug stems from how the backend server processes and sends image data to the frontend application, then the fix may involve changes to the backend code.

User story: As a user, I want uploaded pictures to be visible in the small window within the chat interface, so that I can quickly preview and assess the content of the uploaded pictures without opening them separately.

Functionality: Sending Picture Attachment

[SCRUM-2] [Cosf-5023] Text Duplication - Text Duplication after Sending Picture Attachment with text-description Created: 26/Apr/24 Updated: 30/Apr/24	
Status:	To Do
Project:	Payever
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	**Priority:**	Medium

Attachments:	duplicate.png
Rank:	0|i00007:
Sprint:	

Description

Environment: Staging

Description: After the user attaches a picture and sends it in a chat conversation, the text description associated with the picture gets duplicated in the message input line, leading to confusion and clutter in the user interface.

Pre-conditions:

1. A business account is registered in the system.

STR:

1. Log in to the system.
2. Choose the already exist business.
3. Navigate to message in the “Business Apps“ section.
4. Click plus button at the bottom of the list of messages
5. Click “Channel“.
6. Put “Attach Text Test“ in the Channel name field.
7. Click Create in the upper rignt corner of the New channel window.
8. Click Skip in the appeared Add members window.
9. Click Plus near the message line.
10. Click file in the Add list .
11. Click Add more.
12. Chhose a file (.png format)P from the desctop.

13. Put in description data “Optional test“ in the Optional text field.
14. Click send button.

Expected result: After sending the picture with a description, the message input line should be cleared, ready for the user to type a new message or perform other actions. The description is attached to the photo and sent together.

Actual result: After sending the picture with a description, the text description is duplicated in the message input line, appearing as if the user has typed it again.

Evidence:
https://drive.google.com/file/d/1jWE8ZQ_g0WQ8sBBCxYFfchE5CTPlFDul/view?usp=sharing

Component:

Frontend:

- If the duplication issue is related to how the frontend application handles user input and displays messages in the interface, then the fix would likely involve changes to the frontend code.

Backend:

- If the duplication issue stems from how the backend server processes and sends data to the frontend application, then the fix may involve changes to the backend code.

User story: As a user, I want the message input line to clear properly after sending a picture attachment with a description, so that I can continue typing new messages without encountering duplicated text.

Functionality: Sending Picture Attachment

Evidence:

[SCRUM-1] [Cosf-5002] Crross Button - The Cross button is inactive for deleting uploaded photo as a photo of channel. Created: 26/Apr/24 Updated: 30/Apr/24

Description

Environment: Staging

Description: When a user scrolls through offers on the home page and clicks on “Show next 12 options“ button, the picture of the "Triple Standard" offer does not display on the home page. This issue prevents users from viewing the image associated with the "Triple Standard" offer.

Pre-conditions:

1. Home page is open.

STR:

1. Locate the logo of the website in the header section.
2. Scroll through the offers displayed on the home page.
3. Click on “Show next 12 options“ button.
4. Locate the "Triple Standard" offer and attempt to view its picture.

Expected result: When clicking on “Show next 12 options“ button, the picture of the "Triple Standard" offer is still be displayed on the home page. Users are able to view the image associated with the "Triple Standard" offer regardless of their scrolling or clicking actions.

Actual result: After clicking on “Show next 12 options“ button, the picture of the "Triple Standard" offer does not display on the home page. Users are unable to view the image associated with the "Triple Standard" offer, even though it should be visible

Evidence: https://drive.google.com/file/d/1-bocH0GhS4T9hyz3YkP5E_slZE5h8Ytg/view?usp=drive_link

Component: Frontend

User story: As a user, I want to be able to view the picture of the "Triple Standard" offer on the home page, So that I can evaluate the offer and make an informed decision.

Functionality: Offers on home page > Show next 12 options > Offers` picture display

[WIN-8] [B7] Offer Not Removed from Favorites List After Deleting Created: 02/May/24 Updated: 02/May/24

Status:	To Do
Project:	WinWin
Components:	None
Affects versions:	None

Description

Environment: Staging

Description: When a user clicks on the like button to add an offer to their favorites list and then navigates to the favorites page and clicks the cross button to delete it from the list, the offer is not removed from the favorites list. Instead, the user is redirected to the home page, and the offer remains in the favorites list. This issue prevents users from effectively managing their favorites list.

Pre-conditions:

1. Home page is open.

STR:

1. Navigate to offers on the home page.
2. Click on the like button to add the offer to the favorites list.
3. Navigate to the favorites page by clicking on the likes icon.
4. Locate the added offer in the favorites list.
5. Click on the added offer to view its details.
6. Click the cross button or delete option to remove the offer from the favorites list.
7. Redirect to the home page.

Expected result: After clicking the cross button or delete option to remove an offer from the favorites list, the offer is successfully deleted from the favorites list.

Actual result: After attempting to delete an offer from the favorites list and navigation to the home page the offer remains in the favorites list. The offer is not successfully removed from the favorites list as expected.

Description

Environment: Staging

Description: When a user fills in the name of a city in the designated field, the dropdown list of cities does not display any results except for "Amsterdam." This incomplete dropdown list limits users' ability to select their desired city from the available options.

Pre-conditions:

1. Home page is open.

STR:

1. Click on the city selection field to input the name of a city.
2. Begin typing the name of a city in the field.
3. Note that only "Amsterdam" appears in the dropdown list, and no other cities are displayed as options.

Expected result: When a user fills in the name of a city in the designated field, the dropdown list of cities dynamically updates to display relevant results matching the entered city name. Users are be able to select their desired city from the available options in the dropdown list.

Actual result: After filling in the city name field, the dropdown list of cities only displays "Amsterdam," and no other cities are shown as options. Users are unable to select their desired city from the incomplete dropdown list.

Evidence: https://drive.google.com/file/d/1yXZC8HCh-IdbMNu8L7qHbZytQx0AibH1/view?usp=drive_link

Component: Backend

User story: As a user, I want to see a complete dropdown list of cities when filling in the city name field, So that I can easily select my desired city from the available options.

Functionality: Home page > Dropdown List of Cities

[WIN-5] [B4] Lack of Validation Message for Invalid Email Format in "Request Discount" window Created: 02/May/24 Updated: 02/May/24

Status:	To Do
Project:	WinWin
Components:	None
Affects versions:	None
Fix versions:	None

Description

Environment: Staging

Description: When a user clicks on the "Request Discount" button in the filters window and fills in the email field with an invalid format (such as using special symbols or not following the standard email format), no validation message is displayed on the page. This lack of validation feedback leaves users unaware of the issue with their input.

Pre-conditions:

1. Filters page is open.

STR:

1. Locate the "Request Discount" button within the filters window.
2. Click on the "Request Discount" button to initiate the discount request process.
3. Fill in the email field with an invalid format, such as using special symbols or not following the standard email format.
4. Click “Send Request“ button.

Expected result: After filling in the email field with an invalid format and attempting to submit the discount request, a validation message is displayed on the page informing the user about the issue with their input and prompting them to correct it before proceeding.

Actual result: Despite filling in the email field with an invalid format, no validation message is displayed on the page. Users are not notified about the issue with their input, leaving them unaware of the error and unable to proceed with the discount request process.

Description

Environment: Staging

Description: When a user clicks on the "Request Discount" button in the filters window and fills in the email field with valid data, after clicking the "Send Request" button, there is no reaction on the page. Additionally, no message about the success of the discount request is displayed on the page.

Pre-conditions:

1. Filters page is open.

STR:

1. Locate the "Request Discount" button within the filters window.
2. Click on the "Request Discount" button to initiate the discount request process.
3. Fill in the email field with valid data.
4. Click “Send Request“ button to submit the discount request..

Expected result: After submitting the discount request by clicking the "Send Request" button, the page should display a confirmation message indicating the success of the request. Users should receive feedback that their discount request was successfully submitted.

Actual result: After clicking the "Send Request" button, there is no reaction on the page, and no message about the success of the discount request is displayed. Users are left uncertain about whether their discount request was successfully submitted or not.

Evidence:
https://drive.google.com/file/d/1JL1l2WUPwKOGJEC9tbmGlZv3oY4TXalu/view?usp=drive_link

Component: Frontend

User story: As a user, I want to receive confirmation feedback after sending a discount request, So that I can be informed about the success of my request and proceed accordingly.

Functionality: Filters > Request Discount > Submit request

[WIN-3] [B2] "More Options" Button Not Functional in Share Media Options

Created: 02/May/24 Updated: 02/May/24

Status:	To Do
Project:	WinWin
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	**Priority:**	Medium
Reporter:	tester	**Assignee:**	Unassigned
Resolution:	Unresolved	**Votes:**	0
Labels:	None

Description

Environment: Staging

Description: When a user clicks on the button in the header of the home page to share the page through media, there is an option labeled "More Options" that does not react to clicking and does not redirect the user to additional sharing options

Pre-conditions:

1. Home page is open.

STR:

1. Locate the button in the header designed for sharing the page through media.
2. Click on the button to initiate the sharing process.
3. Click on the "More Options" button to access additional sharing options.

Expected result: Clicking on the "More Options" button within the media sharing options redirects the user to a new window or dropdown menu displaying additional sharing options beyond the default ones provided.

Actual result: Despite clicking on the "More Options" button, there is no reaction, and the user is not redirected to additional sharing options. The button appears non-functional, and users are unable to access additional sharing options beyond the default ones displayed.

Evidence:
https://drive.google.com/file/d/1hRGc6QE1dscZoV02shmxCbkVMJn8UYBt/view?usp=drive_link

Component: Frontend

User story: As a user, I want to access additional sharing options beyond the default ones provided, So that I can share the page through my preferred media channels effectively.

Functionality: Share throug media > More oprions

[WIN-2] [B1] No Offers Displayed After Applying Filters Created: 02/May/24 Updated: 02/May/24

Status:	To Do
Project:	WinWin
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	**Priority:**	Medium
Reporter:	tester	**Assignee:**	Unassigned

Original estimate:	Not Specified		

Rank:	0|i00053:
Sprint:	

Description

Environment: Staging

Description: When a user opens the window of filters, selects filters, and clicks the apply button, no offers are displayed on the page. Despite selecting specific filters and applying them, the page remains empty, failing to show any relevant offers to the user.

Pre-conditions:

1. Home page is open.

STR:

1. Click on the filter icon.
2. Navigate to the filters window.
3. Select filters based on desired criteria.
4. Click the "Apply" button to apply the selected filters.

Expected result: After selecting filters and clicking the apply button, the page displays relevant offers that match the selected criteria. Users are able to see filtered results based on their preferences and make informed decisions about which offers to explore further.

Actual result: Despite applying filters, no offers are displayed on the page, leaving the user with an empty or blank page. This prevents users from accessing relevant offers and makes it impossible for them to browse or interact with the content.

Evidence: https://drive.google.com/file/d/1gtcU_-Nb2P5JW2VFT06Y1cxMTS_p7sqt/view?usp=drive_link

Component: Backend

User story: As a user, I want to see relevant offers displayed on the page after applying filters, So that I can browse and explore offers based on my preferences and make informed decisions.

Functionality: Filters > Apply filters > Offers display

[WIN-1] [B1] Page Flickering Issue When Moving Price Rate Slider in Filters

Created: 02/May/24 Updated: 02/May/24

Status:	To Do
Project:	WinWin
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	**Priority:**	Medium
Reporter:	tester	**Assignee:**	Unassigned
Resolution:	Unresolved	**Votes:**	0
Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original estimate:	Not Specified		

Rank:	0|i0004v:

Description

Environment: Staging

Description: When a user opens the window of filters and moves the price rate slider, the page flickers as it seems to be updating. This flickering effect is distracting and may cause discomfort to users, affecting their browsing experience negatively.

Pre-conditions:

1. Home page is open.

STR:

1. Click on the filter icon.
2. Navigate to the filter window.
3. Locate the price rate slider within the filters.
4. Move the price rate slider to adjust the price range.

Expected result: Moving the price rate slider within the filters smoothly adjusts the price range without causing any flickering or visual disturbances on the page.

Actual result: When moving the price rate slider, the page flickers as if it's constantly updating or reloading. This flickering effect is distracting and disrupts the user's browsing experience.

Evidence: https://drive.google.com/file/d/1gtcU_-Nb2P5JW2VFT06Y1cxMTS_p7sqt/view?usp=drive_link

Component: Frontend

User story: As a user, I want to smoothly adjust the price range using the price rate slider within the filters, So that I can effectively browse and filter products without experiencing distracting flickering effects.

Functionality: Filters > Price Rate Slider

[SCRUM-22] [PAYP-394] Error 400 on Employee Registration Due to Invalid Email Created: 30/Apr/24 Updated: 30/Apr/24

Status:	To Do
Project:	Payever
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	**Priority:**	Medium

Sprint:	

Description

Environment: Staging

Description: When a new employee registers using the invitation letter received after being created by an admin, filling in all required fields including first name, last name, email, and password, and clicking "Register," a 400 error response status is displayed in the devtools console network section.

Pre-conditions:

1. A new employee gets an inviatian via email.

STR:

1. Clicks on the invitation button in the email.
2. Rdirect to the login page.
3. Fill in all required fields including first name, last name, email, and password.
4. Click the "Register" button.

Expected result: After entering valid information in all required fields and clicking "Register," the employee is successfully registered and granted access to the system without any error messages or issues.

Actual result: Despite providing valid information during registration, the employee encounters an error 400 with the message indicating an invalid email.The employee is unable to complete the registration and access the system as expected.

Evidence: https://drive.google.com/file/d/1AvxsQA3sHSeaJa-9dv1Lp843bO4goXUc/view?usp=sharing

Component: Backend

User story: As a new employee, I want to successfully register and access the system after receiving an invitation from the admin, So that I can begin my onboarding process without encountering any issues.

Functionality: Log in via invitation letter

[SCRUM-21] [PAYP-394] Validation Message Language Mismatch Created: 30/Apr/24 Updated: 30/Apr/24

Status:	To Do
Project:	Payever
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	**Priority:**	Medium
Reporter:	tester	**Assignee:**	Unassigned
Resolution:	Unresolved	**Votes:**	0
Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original estimate:	Not Specified		

Rank:	0|i0004f:
Sprint:	

Description

Environment: Staging

Description: When a user edits a new employee account and updates all required information, after clicking the save button, the validation message about success is displayed in English, even though the user is using a German language interface.

Pre-conditions:

1. A user is registered and logged in the system as an admin.
2. Choose the “NO“ business.
3. Navigate to “Settings“ app.

STR:

1. Navigate to the “Settings“ app.
2. Choose the “Employees“ section.
3. Click “+“ button to create an employee profile.
4. Update all required information for the employee account.
5. Click the "Save" button to save the changes.

Expected result: After creating the new employee account and receiving a validation message about success, the message is displayed in the same language as the interface language selected by the user (in this case, German).

Actual result: Despite using the German language interface, the validation message about success is displayed in English after updating the new employee account.

Evidence: https://drive.google.com/file/d/1AvxsQA3sHSeaJa-9dv1Lp843bO4goXUc/view?usp=sharing

Component: Frontend

User story: As a user of the system, I want validation messages about successful actions to be displayed in the same language as my selected interface language, So that I can easily understand and interpret the messages without confusion.

Functionality: Display of the message after creating a new employee account

[SCRUM-20] [PAYP-393] City Information Not Saved Without Choosing from Dropdown List Created: 30/Apr/24 Updated: 30/Apr/24

Status:	To Do
Project:	Payever
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	**Priority:**	Medium
Reporter:	tester	**Assignee:**	Unassigned
Resolution:	Unresolved	**Votes:**	0
Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original estimate:	Not Specified		

Rank:	0|i00047:
Sprint:	

Description

Environment: Staging

Description: When a user updates information about the city by manually typing the name without choosing an option from the dropdown list and clicks "Save," a valid message about successful change is displayed on the page. However, upon reopening the user's profile, the city field is empty, indicating that the information was not saved properly. The city information is only saved if the user chooses an option from the dropdown list.

Pre-conditions:

1. A user is registered and logged in the system as an admin.
2. Choose the “NO“ business.
3. Navigate to “Settings“ app.

STR:

1. Navigate to the “Settings“ app.
2. Choose the “Employees“ section.
3. Click on the emplyee`s account to edit profile.
4. Update the city information by manually typing the name without choosing an option from the dropdown list.
5. Click the "Save" button to save the changes.
6. Reopen the user's profile to check the city information.

Expected result: After updating city information and receiving a valid message about successful change, the updated information is saved and persisted in the system. Reopening the user's profile displays the updated city details accurately, regardless of whether the user chooses from the dropdown list or manually types the city name.

Actual result: Despite receiving a valid message about successful change, the city information updated by the user is not saved properly if the user manually types the city name without choosing an option from the dropdown list. The city field remains empty upon reopening the user's profile.

Evidence:
https://drive.google.com/file/d/10q_VzBFHGPDXFtBiN8BThuLYt50mqLSd/view?usp=sharing

Component: Backend

User story: As a user, I want the city information I update to be properly saved and persisted in the system, So that my profile reflects accurate and up-to-date details.

Functionality: Employee Account Editing

[SCRUM-19] [PAYP-392] Address Information Not Saved After Employee Update Created: 30/Apr/24 Updated: 30/Apr/24

Description

Environment: Staging

Description: After an employee updates their address information by manually entering the details without choosing options from the drop-down list, the valid message about successful change is displayed on the page. However, upon reopening the user's profile, the address field is empty, indicating that the information was not saved properly.

Pre-conditions:

1. A user is registered and logged in the system as an admin.
2. Choose the “NO“ business.
3. Navigate to “Settings“ app.

STR:

1. Navigate to the “Settings“ app.
2. Choose the “Employees“ section.
3. Click on the emplyee`s account to open profile.
4. Update the address information by manually entering the details without choosing options from the drop-down list.
5. Click the "Save" button to save the changes.
6. Reopen the user's profile or navigate back to the address information page.

Expected result: After updating address information and receiving a valid message about successful change, the updated information is saved and persisted in the system. Reopening the user's profile displays the updated address details accurately.

Actual result: Despite receiving a valid message about successful change, the address information updated by the employee is not saved properly. Reopening the user's profile reveals that the address field is empty.

Evidence: https://drive.google.com/file/d/1fKJe-jsvB2yARaA_d8bpl_kmVxD85ZQv/view?usp=drive_link

Component: Backend

User story: As an employee, I want the address information I update to be properly saved and persisted in the system, So that my profile reflects accurate and up-to-date details.

Functionality: Employee Account Edit

[SCRUM-18] [PAYP-388] Inconsistent Display of Limited Access Apps Icons After Access Modification Created: 30/Apr/24 Updated: 30/Apr/24

Status:	To Do
Project:	Payever
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	**Priority:**	Medium

Rank:	0|i0003r:
Sprint:	

Description

Environment: Staging

Description: After an employee updates and changes their access permissions to certain apps, limiting access to some of them, the icons of the limited access apps continue to be displayed on the apps page even after navigating back from the access modification page.

Pre-conditions:

1. A user is registered and logged in the system as an admin.
2. Choose the “NO“ business.
3. Navigate to “Settings“ app.

STR:

1. Navigate to the “Settings“ app.
2. Choose the “Employees“ section.
3. Click “+“ button to create a new employee.
4. Limit access to some apps.
5. Click the "Save" button to save changes.
6. Click "Back to Apps" to navigate to the apps page.
7. Refresh the page or perform an extra update.

Expected result: After creating a new employee account, the first name and last name entered during the creation process are saved and displayed accurately in the employee profile window. The displayed name match the name entered by the admin during account creation.

Actual result: After modifying access permissions and navigating back to the apps page, only the icons of apps the employee has access to are displayed.

Evidence: https://drive.google.com/file/d/141bdynzb2cblYzhHZ9KB4-Iphlrepf6Q/view?usp=sharing

Component: Frontend

User story: As an employee, I want the icons of limited access apps to be consistently hidden from the apps page after modifying my access permissions, So that I can easily identify the apps I have access to without confusion.

Functionality: Apps page

[SCRUM-17] [PAYP-388] Employee Can Unauthorizedly Modify Access Permissions Created: 30/Apr/24 Updated: 30/Apr/24

Description

Environment: Staging

Description: Employees are able to update and change their access permissions to various apps, including adding or removing limits.

Pre-conditions:

1. A user is registered and logged in the system as an admin.
2. Choose the “NO“ business.

STR:

1. Navigate to the “Settings“ app.
2. Choose the “Employees“ section.
3. Click the profile of this account in the list of employees.
4. Attempt to update or change the access permissions for various apps.
5. Click the "Save" button to save changes.

Expected result: Employees don`t have the authority to update or change their access permissions to apps without proper authorization.

Actual result: Employees are able to update and change their access permissions to apps without any restrictions or authorization checks. This allows employees to unauthorizedly modify their access permissions.

Evidence: https://drive.google.com/file/d/141bdynzb2cblYzhHZ9KB4-Iphlrepf6Q/view?usp=sharing

Component: Backend

User story: As an employer, I want to restrict employees from unauthorizedly modifying their access permissions to apps, So that I can ensure the security and integrity of the system's access control mechanisms.

Functionality: Employee Access Control

[SCRUM-16] [PAYP-388] Incorrect Name Saved in Employee Account Creation

Created: 30/Apr/24 Updated: 30/Apr/24

Description

Environment: Staging

Description: When an employer creates a new account for an employee and enters "first" in the first name field and "last" in the last name field, the entered name is not saved. Instead, the name from the employee's email address is automatically taken and saved.

Pre-conditions:

1. A user is registered and logged in the system as an admin.
2. Choose the “NO“ business.

STR:

1. Navigate to the “Settings“ app.
2. Choose the “Employees“ section.
3. Click “+“ button to create a new employee.
4. Enter "first" in the first name field and "last" in the last name field.
5. Provide the employee's email address and any other required information.
6. Click the "Save" button to create the employee account.

Expected result: When creating a new employee account, the name entered by the employer in the first name and last name fields is saved as the employee's name.

Actual result: The name entered by the employer in the first name and last name fields is not saved. Instead, the name from the employee's email address is automatically taken and saved as the employee's name. This results in incorrect information being stored in the employee's account and can lead to confusion and inaccuracies in the system.

Evidence: https://drive.google.com/file/d/141bdynzb2cblYzhHZ9KB4-Iphlrepf6Q/view?usp=sharing

Component: Backend

User story: As an employer, I want the name entered during the creation of a new employee account to be accurately saved in the employee's account, so that I can maintain accurate employee records and prevent confusion in the system.

Functionality: Employee Profile

[SCRUM-15] [PAYP-387] Admin Account Able to Delete Other Admin Accounts Created: 30/Apr/24 Updated: 30/Apr/24

Description

Environment: Staging

Description: When a newly created admin account attempts to delete another admin account, the operation is successful, contrary to the intended behavior.

Pre-conditions:

1. A user is registered and logged in the system as an admin.
2. Choose the “NO“ business.

STR:

1. Navigate to the “Settings“ app.
2. Select another admin account from the list of users.
3. Attempt to delete the selected admin account.

Expected result: Admin accounts can`t delete other admin accounts. Attempting to delete another admin account result in an error message or notification indicating that the operation is not permitted.

Actual result: The newly created admin account is able to successfully delete another admin account.

Evidence:
https://drive.google.com/file/d/1jbFoKIUVxCjQ7VAsWMhvXbr9vSYUZIcz/view?usp=sharing

Component: Backend

User story: As a system administrator, I want to ensure that admin accounts cannot delete other admin accounts, so that I can maintain the integrity and security of the system's user management functionality.

Functionality: Employees Accounts

Functionality: Employee Profile

[SCRUM-13] [PAYP-386] Employee with Limited Access Can Customize Access Beyond Allowed Permissions Created: 30/Apr/24 Updated: 30/Apr/24	
Status:	To Do
Project:	Payever
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	**Priority:**	Medium
Reporter:	tester	**Assignee:**	Unassigned
Resolution:	Unresolved	**Votes:**	0
Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original estimate:	Not Specified		

Rank:	0|i0002n:
Sprint:	

Description

Environment: Staging

Description: When an admin creates a new employee account with limited access, such as access only to settings and custom access to checkouts, the new employee can customize their access and set full access permissions. However, this level of customization should only be allowed for employer accounts. This discrepancy in access control allows employees to exceed their assigned permissions.

Pre-conditions:

1. Log in to the Staging env. as an admin.

STR:

1. Create a new employee account with limited access permissions, such as access only to settings and custom access to checkouts.
2. Log in to the system using the newly created employee account.
3. Navigate to the access settings or permissions section.
4. Attempt to customize access permissions beyond the assigned permissions, such as setting full access.

Expected result: Employees with limited access permissions are not able to customize their access beyond the permissions assigned to them during account creation. The system enforces strict access control to prevent employees from exceeding their assigned permissions.

Actual result: Employees with limited access permissions, such as access only to settings and custom access to checkouts, are able to customize their access and set full access permissions. This allows employees to exceed their assigned permissions.

Evidence:
https://drive.google.com/file/d/1JhXcLDuxOqTp63H8kQTGJGnhc6sVijBH/view?usp=drive_link

Component: Backend

User story: As an administrator, I want to ensure that employees with limited access permissions cannot customize their access beyond the permissions assigned to them, so that I can maintain strict access control and prevent unauthorized access within the system.

Functionality: Employee Accounts

[SCRUM-12] [PAYP-366] Lack of Validation for Spaces in First Name and Last Name Fields Created: 26/Apr/24 Updated: 26/Apr/24

Status:	To Do
Project:	Payever
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	**Priority:**	Medium
Reporter:	tester	**Assignee:**	Unassigned
Resolution:	Unresolved	**Votes:**	0
Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original estimate:	Not Specified		

Rank:	0|i0002f:
Sprint:	

Description

Environment: Staging

Description: When a registered user navigates to the contact information on the Business Details page and changes the first name and last name fields to include only spaces, no validation messages appear on the page. Despite the lack of valid input, the new information is saved after clicking the "Save" button.

Pre-conditions:

1. A user is registered and logged in the system.

STR:

1. Choose Business in the list of businesses.
2. Navigate to settings in the “Business Apps“ section.
3. Choose Settings.
4. Navigate to Settings page.
5. Click Business details on the Setting page.
6. Click Contact.
7. Change the before input date in the First name field with spaces.
8. Change the before input date in the Last name field with spaces.
9. Click the "Save" button to save the changes.

Expected result: When editing the first name and last name fields, entering only spaces should trigger validation messages indicating that the input is invalid.

Actual result: No validation messages appear on the page when entering spaces as the first name and last name. Despite the lack of valid input, the new information with spaces is saved successfully after clicking the "Save" button.

Evidence:
https://drive.google.com/file/d/11HWesG8voC92XGY5QeTzxLv1Ux4YYYsL/view?usp=drive_link

Component: Frontend

User story: As a user, I want the system to validate and prevent the entry of spaces-only values in the first name and last name fields, so that data integrity and consistency are maintained within user profiles.

Functionality: Contact of Business Details

[SCRUM-11] [PAYP-365] Employee Profile Not Created with Cashier Position and Full Affiliate Access Created: 26/Apr/24 Updated: 26/Apr/24

Description

Environment: Staging

Description: After creating a new employee profile, filling the necessary fields, choosing the "Cashier" position, and full access to affiliates, clicking the "Save" button, the employee profile is not created. Instead, an invalid message [object][object] is displayed on the page.

Pre-conditions:

1. A business acount of employer is registered and logged in the system.

STR:

1. Navigate to the page for creating a new employee profile.
2. Fill out the necessary fields for the employee profile, including First name, Surname and email.
3. Choose the "Cashier" position for the employee.
4. Choose full access to affiliates by selecting the appropriate option.
5. Select all optional access for various options available, ensuring that access is granted for each.
6. Click the "Save" button to create the employee profile.

Expected result: After filling out the necessary fields and clicking the "Save" button, the employee profile is successfully created with the chosen position and access settings. The user should receive a confirmation message indicating successful creation, and no invalid messages should be displayed.

Actual result: The employee profile is not created after clicking the "Save" button. Instead, an invalid message [object][object] is displayed on the page, indicating a failure in the creation process. The employee profile is not created.

Evidence:
https://drive.google.com/file/d/1cCdtSMN7MmYEF4s8XmmFOSJ2OKloXemC/view?usp=drive_link

Component: Backend

User story: As an employer, I want to be able to create employee profiles with the "Cashier" position and full access to affiliates, so that I can effectively manage employee roles and access permissions within the system.

Functionality: Add New Employee Profiles

[SCRUM-10] [PAYP-300] Deleted Checkouts Remain in List Despite Successful Deletion Message Created: 26/Apr/24 Updated: 26/Apr/24

Status:	To Do
Project:	Payever
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	**Priority:**	Medium
Reporter:	tester	**Assignee:**	Unassigned
Resolution:	Unresolved	**Votes:**	0
Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified

Rank:	0|i0001z:
Sprint:	

Description

Environment: Staging

*Description:*After deleting checkouts from the list and receiving a message confirming successful deletion, the deleted checkouts remain visible in the list.

Pre-conditions:

1. The emplyee is logged in.

STR:

1. Choose company on the Choose Business page.
2. Click on image of the chosen business.
3. Click checkout in Business Apps window.
4. Click Settings on the Checkout page.
5. Click on the name of the checkout.
6. Click delete checkout.
7. Observe the message confirming successful deletion.

Expected result: After successfully deleting checkouts from the list, the deleted checkouts are no longer visible in the list.

Actual result: Despite receiving a message confirming successful deletion, the deleted checkouts remain visible in the list, indicating that the deletion process is not properly removing the checkouts from the list.

Evidence: https://drive.google.com/file/d/1Yj5ajT-JKOxOzYDnkoSu3HHnD0iwBGNi/view?usp=drive_link

Component: Frontend

User story: As a user, I want deleted checkouts to be removed from the list after receiving a confirmation message about successful deletion, so that I can trust that the checkouts list accurately reflects the current state of the system

Functionality: Checkout Deletion

[SCRUM-9] [PAYP-300] Business List Not Displayed After Logging in via Invitation Link in Employee Profile Created: 26/Apr/24 Updated: 26/Apr/24

Status:	To Do
Project:	Payever
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	**Priority:**	Medium
Reporter:	tester	**Assignee:**	Unassigned
Resolution:	Unresolved	**Votes:**	0
Labels:	None		
Remaining Estimate:	Not Specified

Original estimate:	Not Specified		

Rank:	0|i0001r:
Sprint:	

Description

Environment: Staging

Description: After creating an employee profile and using the invitation link sent via email to log in to the site, the list of businesses is not displayed on the "Choose Business" page. Despite being associated with one or more businesses, the employee is unable to select a business to proceed.

Pre-conditions:

1. The invitation link of emploee is sent via email/

STR:

1. Click the invitation link in the email to log in to the site.
2. Check if the list of businesses associated with the employee profile is displayed.

Expected result: After logging in via the invitation link, the employee should be presented with the "Choose Business" page displaying the list of businesses associated with their profile. This allows the employee to select a business and proceed with oyjer pages.

Actual result: Despite being associated with one or more businesses, the list of businesses is not displayed on the "Choose Business" page after logging in via the invitation link. This prevents the employee from selecting a business and proceeding with accessing the site.

Evidence: https://drive.google.com/file/d/1Yj5ajT-JKOxOzYDnkoSu3HHnD0iwBGNi/view?usp=drive_link

Component: Backend

User story: As an employee invited to access the site via email, I want the list of businesses associated with my profile to be displayed on the "Choose Business" page after logging in via the invitation link, so that I can select the appropriate business and proceed with accessing the site.

Functionality: Emplyee Profile Navigation

[SCRUM-8] [PAYP-300] Employee Access Options Not Saved When Creating New Employee Profile Created: 26/Apr/24 Updated: 26/Apr/24

Status:	To Do
Project:	Payever
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	**Priority:**	Medium

Time Spent:	Not Specified		
Original estimate:	Not Specified		

Rank:	0|i0001j:
Sprint:	

Description

Environment: Staging

Description: After the user fills out the necessary data for a new employee in the "Add Employee" window and selecting all optional access for various options, clicking "Save" does not save the previously chosen access options. Upon opening the newly created profile of the employee, the access options are not retained.

Pre-conditions:

1. A business account of employer is registered in the system.
2. The user is logged in.

STR:

1. Navigate to settingsin the “Business Apps“ section.
2. Choose Employees on the Setting page.
3. Click “+“ to add new employee profile.
4. Fill out the required data for a new employee, such as First name, Last name and email.
5. Choose Admin in the Position drop-down list.
6. Select all optional access for various options available, ensuring that access is granted for each.
7. Click "Save" to create the new employee profile.
8. Open the newly created profile of the employee.

Expected result: After filling out the necessary data for a new employee and selecting optional access options, clicking "Save" should save the chosen access options. Upon opening the newly created employee profile, the access options should be retained and reflect the selections made during employee creation.

Actual result: The previously chosen access options are not saved when creating a new employee profile. Upon opening the newly created employee profile, the access options do not match the selections made during employee creation.

Evidence: https://drive.google.com/file/d/1Yj5ajT-JKOxOzYDnkoSu3HHnD0iwBGNi/view?usp=drive_link

Component: Backend

User story: As an administrator, I want access options selected for new employee profiles to be saved accurately, so that access permissions are consistently applied and maintained in the employee management system.

Functionality: Add New Employee Profiles

[SCRUM-7] [Cosf-5057] Previous Pinned Message Disappears After Accessing Pinned Messages Counter Created: 26/Apr/24 Updated: 30/Apr/24

Status:	To Do
Project:	Payever
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	**Priority:**	Medium
Reporter:	tester	**Assignee:**	Unassigned
Resolution:	Unresolved	**Votes:**	0
Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original estimate:	Not Specified		

Rank:	0|i0001b:
Sprint:	

Description

Environment: Staging

Description: After the user clicks the option button to view pinned messages in the chat interface, the previous pinned message disappears from the sender's side of the chat. However, upon refreshing the page, the previous pinned message reappears as expected. It occurs only on the sender side of the chat.

Pre-conditions:

1. A business account is registered in the system.
2. The user is logged in.

STR:

1. Navigate to messages in the “Business Apps“ section.
2. Open the Message page.
3. Open already exist chat window.
4. Put in “pin“ in the message line.
5. Pin a message in the chat by selecting the option provided.
6. Click the option button to view pinned messages in the chat interface.
7. Refresh the page.

Expected result: When clicking the option button to view pinned messages, the previous pinned message remains visible on the sender's side of the chat, maintaining consistency in the display of important messages.

Actual result: The previous pinned message disappears from the sender's side of the chat after clicking the option button to view pinned messages. However, upon refreshing the page, the previous pinned message reappears as expected.

Evidence: https://drive.google.com/file/d/1nGP-We32-Y9PQxj3EeCgscYGHdDO9kLJ/view?usp=sharing

Component: Frontend

User story: As a user, I want pinned messages to remain visible on the sender's side of the chat interface when viewing pinned messages, so that I can easily access important information without disruptions or inconsistencies.

Functionality: Pinned Message in Chat Interface.

[SCRUM-6] [Cosf-5057] Pinned Message Persists in Chat After Deletion Until Page Update Created: 26/Apr/24 Updated: 30/Apr/24	
Status:	To Do
Project:	Payever
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	**Priority:**	Medium
Reporter:	tester	**Assignee:**	Unassigned
Resolution:	Unresolved	**Votes:**	0
Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original estimate:	Not Specified		

Rank:	0|i00013:
Sprint:	

Description

Environment: Staging

Description: After the user deletes a pinned message in the chat interface, the message continues to appear as pinned within the chat until the page is manually refreshed or updated. However, upon refreshing the page, the pinned message disappears as expected.

Pre-conditions:

1. A business account is registered in the system.
2. The user is logged in.

STR:

1. Navigate to messages in the "Business Apps" section.
2. Open the Message page.
3. Open already exist chat window.
4. Put in "pin" in the message line.
5. Pin a message in the chat by selecting the option provided.
6. Delete the pinned message by selecting the delete option.
7. Update the page.

Expected result: After deleting a pinned message in the chat interface, the message immediately disappears from the pinned section, reflecting the deletion action and maintaining consistency with the chat's current state.

Actual result: The deleted message persists as pinned within the chat interface even after deletion, until the page is manually updated. Upon refreshing the page, the deleted message disappears as expected.

Evidence: https://drive.google.com/file/d/1nGP-We32-Y9PQxj3EeCgscYGHdDO9kLJ/view?usp=sharing

Component:

Frontend

- If the bug occurs solely within the user interface (UI) of the chat interface, such as the display and management of pinned messages, then it's likely a frontend bug.

Backend

- If the persistence of deleted pinned messages is related to how data is managed and transmitted between the frontend and backend, then the bug may be a backend issue.

User story: As a user, I want deleted pinned messages to disappear immediately from the chat interface without requiring a manual page update, so that I can trust that the chat interface accurately reflects the current state of conversations.

Functionality: Pinned Message in Chat Interface.

[SCRUM-5] [Cosf-5056] Emojis List in Chat Interface - Emojis List Doesn't Disappear After Hover Removal or Interaction with Other Elements Created: 26/Apr/24 Updated: 30/Apr/24

Status:	To Do
Project:	Payever
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	**Priority:**	Medium

Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original estimate:	Not Specified		

Rank:	0|i0000v:
Sprint:	

Description

Environment: Staging

Description: When the user hovers over the emoji icon to display the emojis list in the chat interface, the list does not disappear when the mouse is removed or when the user interacts with other elements in the interface. This behavior persists even when opening other chats or clicking on other objects, causing the emojis list to obstruct the view and impede interaction with the chat interface.

Pre-conditions:

1. A business account is registered in the system.
2. The user is logged in.

STR:

1. Navigate to messages in the “Business Apps“ section.
2. Open the Message page.
3. Open already exist chat window.
4. Hover over the emoji icon to display the emojis list.
5. Remove the mouse from the emoji icon without selecting an emoji.
6. Opening other chats.

Expected result: After removing the mouse from the emoji icon or interacting with other elements in the chat interface, the emojis list disappears automatically, allowing users to continue interacting with the interface without obstruction.

Actual result: The emojis list remains visible even after removing the mouse from the emoji icon or interacting with other elements in the chat interface. This behavior persists, obstructing the view and impeding interaction with the chat interface until manually closed.

Evidence:
https://drive.google.com/file/d/1WaZ9oiE5tyAxcUTRXvLnDwsUarlJzI8h/view?usp=sharing

Component: Frontend

User story: As a user, I want the emojis list to disappear automatically after removing the mouse from the emoji icon or interacting with other elements in the chat interface, so that I can navigate and interact with the chat interface without obstruction.

Functionality: Emojis List in Chat Interface

[SCRUM-4] [Cosf-5023] Incorrect Time - IIncorrect Timestamp Displayed During Redirection Created: 26/Apr/24 Updated: 30/Apr/24

Status:	To Do
Project:	Payever
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	**Priority:**	Medium
Reporter:	tester	**Assignee:**	Unassigned
Resolution:	Unresolved	**Votes:**	0
Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original estimate:	Not Specified		

Attachments:	Scrum 3.mp4
Rank:	0|i0000n:
Sprint:	

Description

Environment: Staging

Description: After the user redirects from the Business Apps page to the Message page, an incorrect timestamp is displayed, suggesting an erroneous duration for the redirection process. This discrepancy may cause confusion for users and mislead them regarding the time taken for the navigation.

Pre-conditions:

1. A business account is registered in the system.

STR:

1. Log in to the system.
2. Select the existing business profile.
3. Navigate to the Business Apps page.
4. Attempt to access the Message page by clicking on the relevant button.
5. Observe the timestamp displayed indicating the duration of the redirection process.

Expected result: The timestamp indicating the duration of the redirection process should accurately reflect the time taken for the navigation from the Business Apps page to the Message page.

Actual result: The timestamp displayed for the redirection process inaccurately represents the time taken for the navigation, suggesting an incorrect duration.

Component:

Frontend:

- If the timestamp is generated and displayed by the frontend application, indicating the time taken for the redirection process, then the bug is likely a frontend issue.Frontend code is responsible for displaying the timestamp may have a bug causing it to calculate or display the time incorrectly.

Backend:

- If the timestamp is generated by the backend server and then displayed by the frontend, the issue might be a backend problem. Backend code responsible for handling the redirection process and sending timing data to the frontend may have a bug.

User story: As a user, I want the timestamp displayed during redirection to accurately reflect the time taken for the process, so that I can have a clear understanding of the performance of the system.

Functionality: Redirection from Business App page to Message page.

[SCRUM-3] [Cosf-5023] Picture Visibility - Picture Not Visible in Small Window After Uploading in Message Chat Created: 26/Apr/24 Updated: 30/Apr/24

Status:	To Do
Project:	Payever
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	**Priority:**	Medium

Original estimate:	Not Specified		

Attachments:	bandicam 2024-04-26 19-24-53-110.mp4
Rank:	0|i0000f:
Sprint:	

Description

Environment: Staging

Description: After the user uploads a picture in the message chat, the picture is not visible in the small window or thumbnail preview within the chat interface. This issue prevents users from quickly viewing the uploaded picture without opening it separately, reducing the efficiency and convenience of the chat feature.

Pre-conditions:

1. A business account is registered in the system.

STR:

1. Log in to the system.
2. Select the existing business profile.
3. Navigate to the messaging feature located in the "Business Apps" section.
4. Enter an ongoing conversation or select an existing conversation thread.
5. Click on the "+" icon adjacent to the message input area.
6. From the options presented, choose "Photo and Video" from the Add list.
7. Click on "Add More" to initiate the file selection process.
8. Select a file to upload from the device's gallery, ensuring it is in .png format.
9. Observe the small thumbnail preview within the chat interface where the uploaded picture should be displayed.

Expected result: After uploading a picture in the message chat, the uploaded picture should be immediately visible in the thumbnail preview within the chat interface. Users should be able to preview the uploaded picture without needing to open it separately.

Actual result: After uploading a picture in the message chat, the picture is not visible in the small window or thumbnail preview within the chat interface. Instead, the small window remains blank or displays a placeholder image, failing to show the uploaded picture.

Component:

Frontend:

- If the bug is related to how the frontend application handles displaying images within the chat interface, such as rendering thumbnails or preview images, then the fix would likely involve changes to the frontend code.

Backend:

- If the bug stems from how the backend server processes and sends image data to the frontend application, then the fix may involve changes to the backend code.

User story: As a user, I want uploaded pictures to be visible in the small window within the chat interface, so that I can quickly preview and assess the content of the uploaded pictures without opening them separately.

Functionality: Sending Picture Attachment

[SCRUM-2] [Cosf-5023] Text Duplication - Text Duplication after Sending Picture Attachment with text-description Created: 26/Apr/24 Updated: 30/Apr/24

Status:	To Do
Project:	Payever
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	**Priority:**	Medium

Resolution:	Unresolved	**Votes:**	0
Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original estimate:	Not Specified		

Attachments:	duplicate.png
Rank:	0|i00007:
Sprint:	

Description

Environment: Staging

Description: After the user attaches a picture and sends it in a chat conversation, the text description associated with the picture gets duplicated in the message input line, leading to confusion and clutter in the user interface.

Pre-conditions:

1. A business account is registered in the system.

STR:

1. Log in to the system.
2. Choose the already exist business.
3. Navigate to message in the “Business Apps“ section.
4. Click plus button at the bottom of the list of messages
5. Click “Channel“.
6. Put “Attach Text Test“ in the Channel name field.
7. Click Create in the upper rignt corner of the New channel window.
8. Click Skip in the appeared Add members window.
9. Click Plus near the message line.
10. Click file in the Add list .
11. Click Add more.
12. Chhose a file (.png format)P from the desctop.

13. Put in description data “Optional test“ in the Optional text field.
14. Click send button.

Expected result: After sending the picture with a description, the message input line should be cleared, ready for the user to type a new message or perform other actions. The description is attached to the photo and sent together.

Actual result: After sending the picture with a description, the text description is duplicated in the message input line, appearing as if the user has typed it again.

Evidence:
https://drive.google.com/file/d/1jWE8ZQ_g0WQ8sBBCxYFfchE5CTPlFDul/view?usp=sharing

Component:

Frontend:

- If the duplication issue is related to how the frontend application handles user input and displays messages in the interface, then the fix would likely involve changes to the frontend code.

Backend:

- If the duplication issue stems from how the backend server processes and sends data to the frontend application, then the fix may involve changes to the backend code.

User story: As a user, I want the message input line to clear properly after sending a picture attachment with a description, so that I can continue typing new messages without encountering duplicated text.

Functionality: Sending Picture Attachment

Evidence:

[SCRUM-1] [Cosf-5002] Crross Button - The Cross button is inactive for deleting uploaded photo as a photo of channel. Created: 26/Apr/24 Updated: 30/Apr/24
